- <https://libertyhomeequity.com/>

Technologies: AngularJS, JavaScript, HTML5, CSS3, Wordpress, PHP, Jira.

WEB DEVELOPER

Lieff Cabraser Heimann & Bernstein (February 2016 - February 2017)

Web developer for major plaintiffs' law firm. (WordPress, HTML, CSS, PHP, JavaScript, Bootstrap, SQL) So far I've:

- Made changes that doubled traffic from 167,000 to 329,000 hits per month
- Transitioned the site from FindLaw to WordPress, resulting in a savings of \$5000 per month
- Made the site responsive (works on mobile devices)
- Upgraded the forms system to a system that's easier for all of us to manage and scale.
- Halved site loading times, which, in addition to making the user experience better, results in better search results.
- Set up Google Analytics tracking from initial visit to form completion.
- Greatly increased security on the site, dramatically reducing attempted attacks.

Projects:

- lieffcabraser.com - Main site. (WordPress)
- unfairbanklending.com - New site with a more contemporary design. (WordPress)
- mdlcourse.com and lchbtest.com - Test sites for an eventual relaunch (WordPress)

Technologies: JavaScript, jQuery, HTML5, CSS3, Wordpress, PHP

FREELANCE WEB DEVELOPER (February 2015 - Present)

Freelance Web Developer for hire. My focus included:

- Frontend applications, HTML, CSS, Foundation, Bootstrap, Responsive Frameworks, JavaScript.
- Setting up and troubleshooting sites in PHP.
- WordPress and Drupal development.

Notable Projects:

- pagerduty.com - Marketing site for tech startup (WordPress, Marketo, CSS, HTML, PHP, JavaScript)
- sb-architects.com - Site for Architecture Firm (WordPress, CSS, HTML, PHP)
- cnprc.ucdavis.edu - California National Primate Research Center at UC Davis (WordPress)
- hinaleaimaging.com - Marketing and sales site for tech startup (WordPress, PHP, CSS, JavaScript)

Technologies: JavaScript, jQuery, HTML5, CSS3, Wordpress, PHP

TECHNICAL PRODUCER

UBM Tech - San Francisco, CA (January 2011- January 2015)

Technical Producer for UBM Tech, a live technology events group within a multinational business media corporation, UBM Plc. My main duties were as follows:

- Web Developer for flat PHP and WordPress-based event sites. This was about 50% of my job. Mostly front-end work, but some back-end work as well. Coding in PHP, HTML, CSS and using a Blueprint framework.
- Managed our network of contractors - assigning work to them, intervening/escalating/assisting when necessary, and overseeing the annual budget for contract work - 6 contractors at a budget of \$80,000/year.
- Managed video and photography teams at live events to deliver content to event websites.
- Produced video Livestream at corporate events.
